

blu'line

blu'box becomes mobile - the new rollable and stackable system of blu'line

blu'mobil 104 gn - food transport now with even more flexibility

The individual solution for professional mobile food distribution

The new blu'mobil 104 gn stackable and rollable system offers complete mobility and adaptability to the individual requirements of distributing cold and hot food. The low weight and ergonomic handles of the boxes allow easy handling and a smooth workflow. All individual components can be removed without tools, which allows hygienic cleaning of all components in no time at all.

blu'mobil 104 gn lite

Article No.: 4000779

- > interior of both boxes is automatically heated to approx. +80° C (self-regulating)
- > each container can be used individually
- > transport of up to 100 kg of food
- > 24 GN slide-in units in total

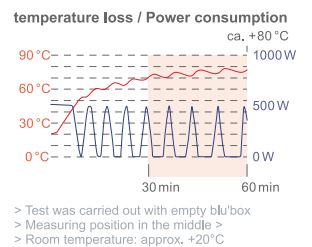

blu'mobil 104 gn hot ²

Article No.: 4000780

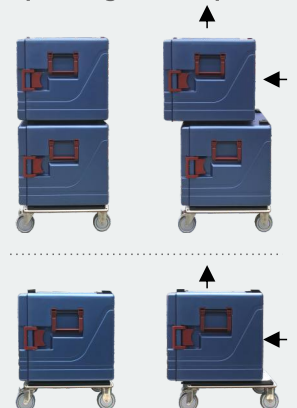

- > temperature of both boxes adjustable via respective display (from +20° C to +85° C)
- > each interior is individually heatable
- > each container can be used individually
- > 24 GN slide-in units in total

Advantages

Separating the components

> variably applicable

> individual components can be separated easily and without tools

> self-regulating and adjustable heating unit available

> small and light construction

> high quality and powerful heating technology

> passive air circulation cooling possible

The right product for every need

Five different versions that meet all food distribution requirements. The high-quality heating technologies of the self-regulating lite heater and the controllable hot² heating system heat the interior of the containers quickly and reliably up to +85°C. The adjustable hot² heating system can be infinitely adjusted from +20°C to +85°C. Due to the excellent insulating performance of the containers, the passive variant is also suitable for transporting hot food.

blu'mobil 104 gn passiv part No.: 4000765

- > suitable for transporting cold and hot food
- > excellent insulation performance
- > retrofitting of a blu'box cool-accu possible

blu'mobil 104 gn lite + passiv part No.: 4000777

- > Interior of the lite container is heated to approx. +85° C (self-regulating)
- > each container can be used individually
- > retrofitting of a blu'box cool-accu possible

blu'mobil 104 gn hot² + passiv part No.: 4000778

- > Temperature of the hot² container adjustable by display (+20° C to +85° C)
- > each container can be used individually
- > retrofitting of a blu'box cool-accu possible

Retrofitting possibility for all blu'mobil 104 gn models

The models of the blu'mobil 104 gn series are also ideal for cold transport. The excellent insulation alone makes it very easy to distribute cold food. In combination with etol's own eutectic plate "blu'box cool-accu", cold distribution is even more efficiently.

This can also be used in conjunction with our adjustable circulating air heating. Here it is possible to set that only the fan works, which leads to circulation of cold air.

Strong products for catering and professional kitchens.
