

# blu'mobil 104 gn - lite

Isolated and heated food distribution trolley for keeping warm active for the professional catering and canteen kitchen sector, for distributing warm food (convection-heated) in up to 4 GN containers 1/1, 200mm or on up to 24 GN trays, with self regulating heating technology.

## Product description

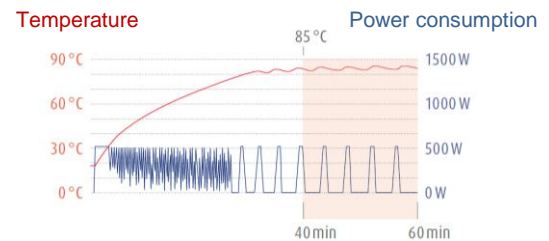

- > Easy handling - strongly fixed on each other, individual articles can be detached without tools
- > Modular design for flexible application (different containers can be combined)
- > Thermally insulated transport boxes made of robust polypropylene and polyurethane foam
- > Dishwasher-safe (after removing the heating unit)
- > Circulating air heated by self-regulating heating element
- > heating power: approx. +85°C
- > Heating time for empty containers: approx. 40 min (up to +85°C)
- > Power consumption: 2x 500 W, 220-240 V, 50 Hz
- > Temperature application range: -20°C up to +100°C
- > 2 fixed castors; 2 swivel castors with parking brakes
- > 24 plastic support ledges
- > Colour: blue metallic (brown-red fittings)

## Product data

- > L/W/H: 735 x 520 x 1356 mm
- > Art.-no.: 4000779
- > Net weight: 63 kg netto

## Packing

- > L/W/H: 800 x 600 x 1600 mm
- > Gross weight: 73 kg

Measurement curve per heater: test with empty container, measuring position in the middle, room temperature: approx. +20°C

## Possible Combinations (at the moment)
