

Reuseable dishes:

Perfectly clean, dry in a flash,
quickly back in use.

**NEW
RINSE AIDS
FOR REUSEABLE
DISHES**

Clean and dry plastic dishes in no time at all.

We bring more speed to your work processes: our detergents and plastic rinse aids are perfectly matched to your wash ware and ensure residue-free drying, even with reusable dishes. The dishes are immediately stackable and ready for storage.

The all-round carefree solution from etol.

The proportion of plastic dishes is constantly increasing. We have responded to the increased demand in this area with two newly developed products: the two new rinse aids are specially tailored to the particular requirements of reusable plastic dishes and significantly reduce your workload.

We are only satisfied when everything works for you.

Benefit from our many years of experience and expertise in the field of plastic dishes: etol ensures that your dishwasher technology delivers optimum performance with all types of dishes. To do this, we analyze the work processes directly on site in your kitchen and optimally coordinate the dishwasher, detergent and rinse aid – individually and down to the last detail. This gives you the certainty of having exactly the right solution for every requirement.

2 NEW
RINSE AIDS
FOR REUSABLE
DISHES

> Reduces the work significantly

> Fast drying and improvement of the process – the dishes can be stacked more quickly

> Perfect adjustment of all parameters by the etol service team

DRIP-FREE AND
STREAK-FREE
DRYING

Our aim is to achieve optimum interaction between warewashing and dosing technology, chemicals and energy. To achieve this, we adjust, correct and test everything until the result is perfect. Once our technicians have visited you, everything is up and running - all you need to do is order the right products. This is what we mean by working in partnership.
