

etolit 2000

Dishwashing detergent in powder form, mildly alkaline, chlorine-free, particularly suitable for aluminium

Application / Dosage

- > **etolit 2000** is for professional use only
- > Can be used with the following water hardness: all
- > If the water is high in salt or very hard, a special water treatment system must be used to avoid mineral deposits on the wash ware
- > For a perfect rinsing result the conductivity of the raw water should not exceed 100 $\mu\text{S}/\text{cm}$
- > The temperature of the washing zone should be at least 60°C

Dosage: 1 - 4 g/l

Manual dosage

- > The concentration of the dosage changes depending on the degree of contamination of the wash ware and the water quality on site

Product Features

- > High material protection
- > Ideal starch dissolving capacity
- > Exceptionally effective grease dissolving capacity
- > Effective for light food colouring residues
- > Ideal cleaning power
- > Environmentally friendly and odourless as it is chlorine-free
- > Delivers optimum rinsing results in combination with etolit rinse aids

Application

- > Ideal for cleaning porcelain, stainless steel, plastic, glass and aluminium
- > Suitable for use in hood and under-table dishwashers

Important Information

- > **etolit 2000** is suitable for all food processing companies
- > Do not mix with other products, do not transfer product into other containers
- > Close the lid again after removal!
Product can clump together due to moisture and lose its effectiveness
- > The operating instructions of the Dishwasher manufacturer must be observed

etolit 2000

Dishwashing detergent in powder form, mildly alkaline, chlorine-free, particularly suitable for aluminium

Technical Data

- > Colour..... White powder
- > Density..... 1,0 g/ml
- > pH-value 14
- > Storability..... 4 years
- > Storage conditions.... Between -10 and 40°C
