

etolit 6100

Liquid detergent for glasses and dishes, mildly alkaline, special hardness-binding properties, chlorine and phosphate-free

Application / Dosage

- > **etolit 6100** is for professional use only
- > Can be used with the following water hardness: all
- > In the case of salty or very hard water, a special water preparation system should be used for optimum rinsing performance
- > For a perfect rinsing result the conductivity of the raw water should not exceed 100 $\mu\text{S}/\text{cm}$
- > The temperature of the main washing zone should be at least 60°C

Dosage: 1,5 - 4 g/l

- > The concentration of the dosage changes depending on the degree of contamination of the wash ware and the water quality on site
- > The dosing is carried out by an automatic dosing system: etolmat boy, etolmat 812, etolmax 812
- > Suitable for all automatic dosing units

Product Features

- > Especially suitable for high water hardness
- > Excellent cleaning power
