

# Doyen SK33E

Rinsing agent with water softener for cleaning and disinfection appliances, acidic

## Application / Dosage

- > **Doyen SK33E** is for professional use only
- > Applicable at the following water hardness: recommended from 30°dH

**Dosage:** 0,5 – 7,0 ml / l

- > The dosing is done automatically
- > Use by qualified personnel only

## Product Features

- > Acidic bedpan rinse aid with softener for washer-disinfectors
- > Is particularly suitable for problematic water conditions (phosphate inoculations)
- > Ensures stain-free, shiny care dishes
- > Highly effective softening of the water
- > Represents an ideal combination of rinse aid and softener
- > Prevents limescale from settling in the steam generators, on the care utensils, in the rinse chamber and in the pipes

## Application

- > Particularly suitable for washer-disinfectors with thermal disinfection

## Important Information

- > Do not mix with other products, do not transfer product into other containers.
- > Tanks, pipes and dosing devices must be rinsed with water before changing products.
- > The operating instructions of the device manufacturer must be observed.

**Marking:**  

Doyen SK33E complies with European guidelines for medical devices.

If a serious incident occurs with this product, it must be reported to the manufacturer and the relevant national authority.

# Doyen SK33E

Rinsing agent with water softener for cleaning and disinfection appliances, acidic
